

How do I use Okta to login to the Atomic Console?

1. Supported features

The Atomic Console Okta integration enables Atomic customers to log into the Atomic Console using Okta as a single sign-on provider via SP-initiated SSO flow.

2. Configuration steps

- **Add our app**

Follow these instructions in order to install our app

https://help.okta.com/en/prod/Content/Topics/Apps/Apps_Apps_Page.htm

☰ Add Atomic Console

1 General Settings

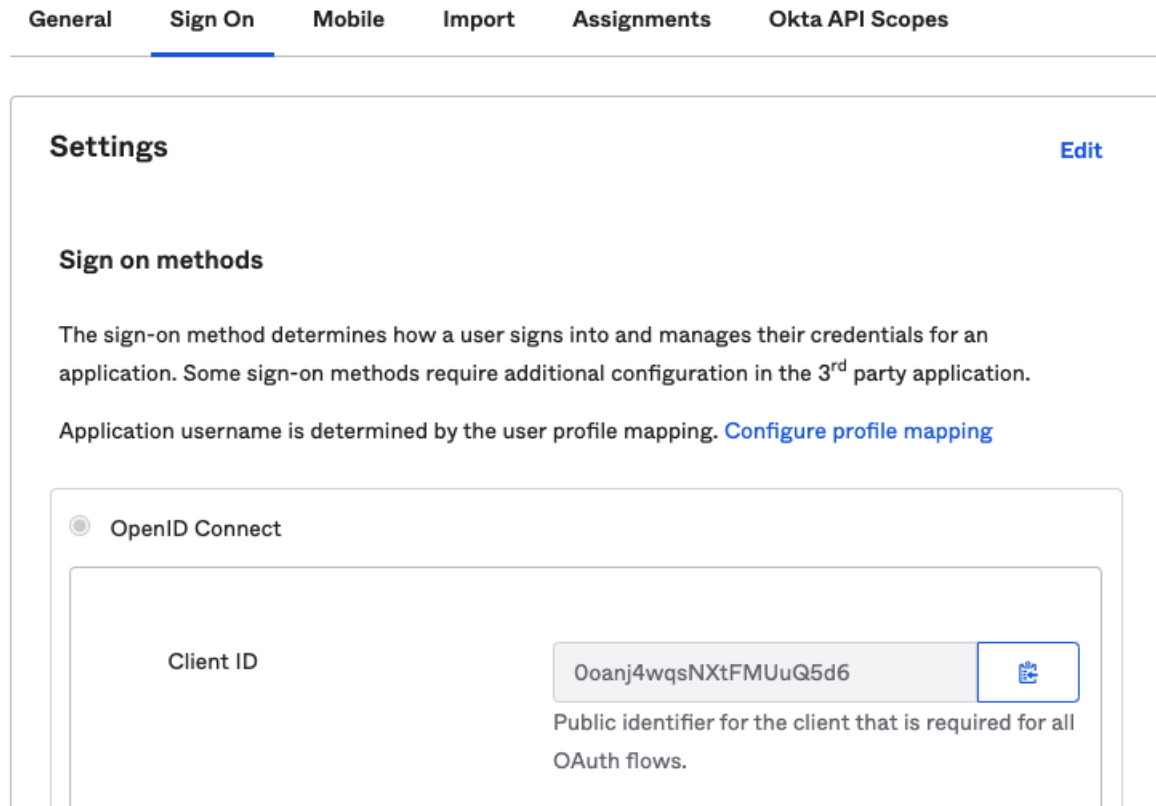

General Settings - Required

Application label	<input type="text" value="Atomic Console"/>
	<small>This label displays under the app on your home page</small>
Application Visibility	<input type="checkbox"/> Do not display application icon to users
	<input type="checkbox"/> Do not display application icon in the Okta Mobile App
Cancel	<input type="button" value="Done"/>

General settings

All fields are required to add this application unless marked optional.

- **Copy the authentication information to send to Atomic**
 - In the “Sign on” section of the Atomic Console’s application copy the “Client Id” value as in the example:

- Copy your okta organization URL that Atomic is going to use in order to authenticate your users. It’s the URL that you access the organization with:
<https://developer.okta.com/docs/guides/find-your-domain/findorg/>

- **Send email with the collected information**

After you have the **ClientId** and the **okta organization URL** please send an email to your atomic point of contact, or engineering@atomicfi.com with this information.

Example:

ClientId: 0oanj4wqsNXtFMUuQ5d6

Okta organization URL: dev-company.okta.com

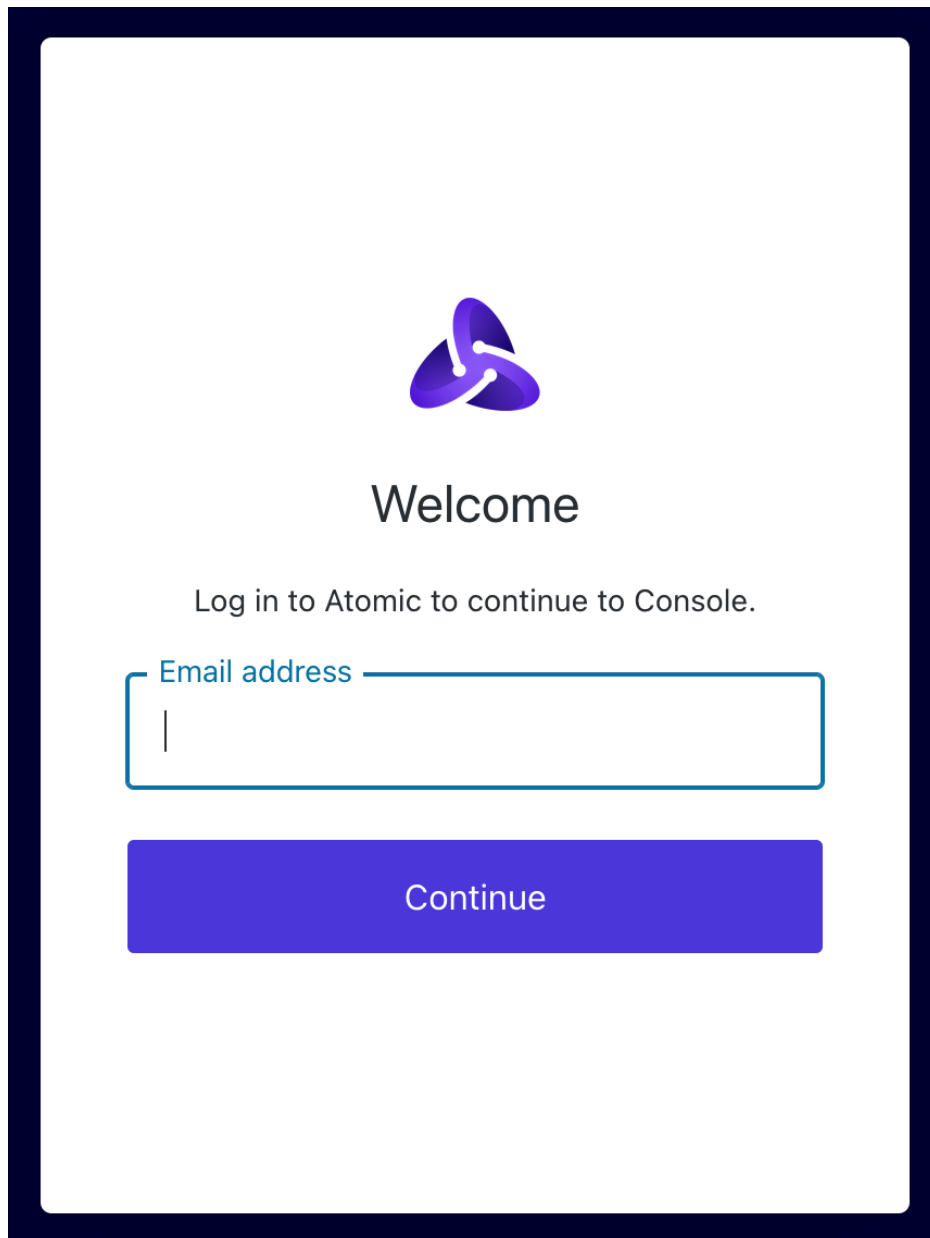

Username Email Domain: company.com - *domain used by users to login to Atomic*

We'll answer as soon as possible in order to make sure you can test the integration.

At this point, if an Okta user from your organization is assigned to the Atomic Console OKTA integration, it will be possible for them to login to the Atomic Console using Okta.

- **Login to Atomic Console**

After you have your Atomic account to access our application you just need to put your email in the Login page. After hitting the `Next` button you will be redirected to Okta and then after a successful login you will redirect to your Console within Atomic.

Welcome

Log in to Atomic to continue to Console.
